BARJ LAZUARDI

WEB DEVELOPER

Profile Info

A web developer who loves tinkering with technology. In my career as a full-stack web developer, I've gained extensive experience crafting robust and dynamic web applications, continually refining my skills along the way. Skilled in collaborating with diverse teams on various projects, I bring a blend of technical expertise and effective communication to drive successful outcomes. Excited about contributing my skills to innovative projects; the more, the better.

Experience

Web Developer   2024 - Present
PT. Lapak Satwa Indonesia l Jakarta · (Remote)

As a Full-Stack Developer, I developed and maintained a secure e-commerce platform for buying and selling pets using Laravel, Bootstrap, and MySQL. I optimized database queries, models, and relationships to improve performance, fixed UI issues to ensure responsiveness across browsers and devices, and automated tasks using cron jobs and Laravel Scheduler. Additionally, I built admin panel features to simplify data management and operations.

Web Developer   2023
Diskominfo l Tangerang City

I developed a website for the Tangerang City regional inflation control team. Utilizing the CodeIgniter 3 framework, Bootstrap 5 for styling, and ensuring secure data exchange through REST API with JWT Tokens and CSRF, the site is fortified. The Admin Panel, powered by AdminLTE 3, serves as a user-friendly interface for administrators to manage the content management system (CMS).

Education

Bachelor of Information System   2019 - 2023
Pradita University l Tangerang

I majored in information systems, learning essential skills in managing software, databases, web solutions, and basic data networks. Information systems connect the technical side (like technology) with non-technical aspects (business and management). The program also covered multimedia, programming, and IT security.
